Vol. 176 No. 1/2

GENE

AN INTERNATIONAL JOURNAL ON GENES AND GENOMES

17 October 1996

CONTENTS

Bowman, T.L., Kaludov, N.K., Klein, M. and Hurt, M.M. 1–8
An *H3* coding region regulatory element is common to all four nucleosomal classes of mouse histone-encoding genes

Islam, N., Poitras, L., Gagnon, F. and Moss, T. 9–16
Antisense and sense poly(A)$^-$RNAs from the *Xenopus laevis* pyruvate dehydrogenase gene loci are regulated with message production during embryogenesis

Kuo, J.S., Veale, R., Maxwell, B. and Sive, H. 17–21
Translational inhibition by 5′-polycytidine tracts in *Xenopus* embryos and in vitro

Aínsa, J.A., Martín, C., Cabeza, M., De la Cruz, F. and Mendiola, M.V. 23–26
Construction of a family of *Mycobacterium/Escherichia coli* shuttle vectors derived from pAL5000 and pACYC184: their use for cloning an antibiotic-resistance gene from *Mycobacterium fortuitum*

De Vendittis, E. and Bocchini, V. 27–33
Protein-encoding genes in the sulfothermophilic archaea *Sulfolobus* and *Pyrococcus*

Tsuchiya, E., Matsuzaki, G., Kurano, K., Fukuchi, T., Tsukao, A. and Miyakawa, T. 35–38
The *Saccharomyces cerevisiae SSD1* gene is involved in the tolerance to high concentration of Ca^{2+} with the participation of *HST1/NRC1/BFR1*

Alves, G., Tatro, A. and Fanning, T. 39–44
Differential methylation of human *LINE-1* retrotransposons in malignant cells

Shimizu, E., Shirasawa, H., Kodama, K., Sato, T. and Simizu, B. 45–48
Expression, regulation and polymorphism of the *mxi1* genes

Love, C.A., Lilley, P.E. and Dixon, N.E. 49–53
Stable high-copy-number bacteriophage λ promoter vectors for overproduction of proteins in *Escherichia coli*

McMorran, B.J., Merriman, M.E., Rombel, I.T. and Lamont, I.L. 55–59
Characterisation of the *pvdE* gene which is required for pyoverdine synthesis in *Pseudomonas aeruginosa*

Blanco, J., José, J., Coque, R. and Martín, J.F. 61–65
Characterization of the *secA* gene of *Streptomyces lividans* encoding a protein translocase which complements an *Escherichia coli* mutant defective in the ATPase activity of SecA

Winkler, H., Brostjan, C., Csizmadia, V., Natarajan, G., Anrather, J. and Bach, F.H. 67–72
The intron-exon structure of the porcine E-selectin-encoding gene

Krath, B.N. and Hove-Jensen, B. 73–79
Bacillus caldolyticus prs gene encoding phosphoribosyldiphosphate synthase

Moriya, S. and Ogasawara, N. 81–84
Mapping of the replication origin of the *Bacillus subtilis* chromosome by the two-dimensional gel method

Lee, Y.-J., Chen, Y.-P., Wang, S.-H., Chow, W.-Y. and Lin, L.-Y. 85–92
Structure and expression of metallothionein gene in ducks

An, Z., Farman, M.L., Budde, A., Taura, S. and Leong, S.A. 93–96
New cosmid vectors for library construction, chromosome walking and restriction mapping in filamentous fungi

Chenal, V., Souque, P., Markovits, A. and Griffais, R. 97–101
Choosing highly specific primers for the polymerase chain reaction using the octomer frequency disparity method: application to *Chlamydia trachomatis*

Panaccione, D.G., Pitkin, J.W., Walton, J.D. and Annis, S.L. 103–109
Transposon-like sequences at the *TOX2* locus of the plant-pathogenic fungus *Cochliobolus carbonum*

Bordonné, R. and Tarassov, I. 111–117
The yeast *SME1* gene encodes the homologue of the human E core protein

Linker, R.A., Baeuerle, P.A. and Kaltschmidt, C. 119–124
Cloning of the murine relA (p65 NF-κB) gene and comparison to the human gene reveals a distinct first intron

Biegel Carson, S.D., Thomas, C.E. and Elkins, C. 125–129
Cloning and sequencing of a *Haemophilus ducreyi fur* homolog

Pfleiderer, M., Falkner, F.G. and Dorner, F. 131–137
Deletion of the myristylation signal allows high-level production of the hepatitis B virus large surface glycoprotein preS1 with vaccinia virus recombinants

Niforas, P., Chu, M.D. and Bird, P. 139–147
A retinoic acid/cAMP-responsive enhancer containing a cAMP responsive element is required for the activation of the mouse thrombomodulin-encoding gene in differentiating F9 cells

Baulard, A., Kremer, L., Supply, P., Vidaud, D., Bidart, J.-M., Bellet, D. and Locht, C. 149–154
A new series of mycobacterial expression vectors for the development of live recombinant vaccines

Hsia, R.-c. and Bavoil, P.M. 155–162
Sequence analysis of the *omp2* region of *Chlamydia psittaci* strain GPIC: structural and functional implications

Hsia, R.-c. and Bavoil, P.M. 163–169
Homologs of *Escherichia coli recJ, gltX* and of a putative 'early' gene of avian *Chlamydia psittaci* are located upstream of the 'late' *omp2* locus of *Chlamydia psittaci* strain guinea pig inclusion conjunctivitis

Braibant, M., Lefèvre, P., de Wit, L., Peirs, P., Ooms, J., Huygen, K., Andersen, A.B. and Content, J. 171–176
A *Mycobacterium tuberculosis* gene cluster encoding proteins of a phosphate transporter homologous to the *Escherichia coli* Pst system

Pasternak, C., Chen, W., Heck, C. and Klug, G. 177–184
Cloning, nucleotide sequence and characterization of the *rpoD* gene encoding the primary sigma factor of *Rhodobacter capsulatus*

(continued on inside back cover)

Kindly note that the scope of the journal has recently changed. Several articles in this issue were under consideration before this change was initiated.

For insight into the present scope, potential authors of Gene articles are referred to the description published at the front of this issue, as well as to the Editorial and contents of issue 174/1. All information about Gene, including tables of contents, can also be found at:

http://www.elsevier.nl/locate/gene or http://www.elsevier.com/locate/gene

0378-1119(19960205)176:1-2;1-J

Rocco, L., Stingo, V. and Bellitti, M. 185–189
Cloning and characterization of a repetitive DNA detected by *Hin*dIII in the genome of *Raja montagui* (Batoidea, Chondrichthyes)

Konopiński, R., Nowak, R. and Siedlecki, J.A. 191–195
Alternative polyadenylation of the gene transcripts encoding a rat DNA polymerase β

Battista, M.C., Bergamini, G., Campanini, F., Landini, M.P. and Ripalti, A. 197–201
Intracellular production of a major cytomegalovirus antigenic protein in the methylotrophic yeast *Pichia pastoris*

Neeper, M., Lowe, R., Galuska, S., Hofmann, K.J., Smith, R.G. and Elbrecht, A. 203–209
Molecular cloning of an avian anti-Müllerian hormone homologue

Hamada, T., Tashiro, K., Tada, H., Inazawa, J., Shirozu, M., Shibahara, K., Nakamura, T., Martina, N., Nakano, T. and Honjo, T. 211–214
Isolation and characterization of a novel secretory protein, stromal cell-derived factor-2 (SDF-2) using the signal sequence trap method

Oki, M., Kakikawa, M., Yamada, K., Taketo, A. and Kodaira, K.-I. 215–223
Cloning, sequence analysis, and expression of the genes encoding lytic functions of Bacteriophage ϕg1e

Carbonell, X. and Villaverde, A. 225–229
Peptide display on functional tailspike protein of bacteriophage P22

Okano, K. and Kambara, H. 231–235
Fragment walking for long DNA sequencing by using a library as small as 16 primers

Ruiz, A., Bhat, S.P. and Bok, D. 237–242
Expression and synthesis of the Na,K-ATPase β2 subunit in human retinal pigment epithelium

Gao, Y.C., Chauthaiwale, V.M., Rampalli, A.M. and Zelenka, P.S. 243–247
Expression of alternatively spliced PCTAIRE-1 mRNA in PC12 cells and neonatal rat brain

Ghosh, S. and Lowenstein, J.M. 249–255
A multifunctional vector system for heterologous expression of proteins in *Escherichia coli*

Bolívar, J., Goenechea, L.G., Grenett, H., Pendón, C. and Valdivia, M.M. 257–258
Cloning and sequencing of the genes encoding the hamster ribosomal transcription factors UBF1 and UBF2[1]

Short Communications

Shamsher, M. and Montano, X. 259–262
Analysis of intron 4 of the p53 gene in human cutaneous melanoma

Hiltonen, T., Clarke, A.K., Karlsson, J. and Samuelsson, G. 263–264
A cDNA coding for glutathione *S*-transferase from the unicellular green algae *Coccomyxa* sp.[1]

Ostiguy, S., Gilbert, M., Shareck, F., Kluepfel, D. and Morosoli, R. 265–267
Cloning and sequencing of the *secY* homolog from *Streptomyces lividans* 1326

Gao, B., Flores, S.C., Bose, S.K. and McCord, J.M. 269–272
A novel *Escherichia coli* vector for oxygen-inducible high level expression of foreign genes

Mertens, B., Gobright, E. and Seow, H.-F. 273–274
The nucleotide sequence of the bovine interleukin-5-encoding cDNA[1]
